

## **How to use math**

### **Using the 1 percent rule**

1. What is 23% of 540.

First step find 1 percent of the price 540, you move two decimal places to the left. - 540. -> 5.40

Then multiply by the percentage value. -  $5.40 * 23 = 124.3$

2. What is 3% of 65.
  - $0.65 * 3 = 1.95$
3. What is 15% of 132.
  - $1.32 * 15 = 19.8$
